DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 25-30 and 41-49, drawn to a method for protecting a hydroxyl moiety of a nucleic acid comprising reacting said nucleic acid with levulinic acid in the presence of a coupling agent, classified in class 536, subclass 55.3.
 - II. Claims 31-35, drawn to a method for protecting a hydroxyl moiety of a carbohydrate comprising reacting said carbohydrate with levulinic acid in the presence of a coupling agent, classified in class 536, subclass 18.6.
 - III. Claims 36-40, drawn to a method for protecting a hydroxyl moiety of a steroid molecule comprising reacting said steroid molecule with levulinic acid in the presence of a coupling agent, classified in class 540, subclass 502.
 - IV. Claims 55-64, drawn to a method for generating a cyclohexylcarbodiimide derivatized polymeric support from a cyclohexylurea derivatized polymeric support, classified in class 560, subclass 334.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 1623

808.01). In the instant case the different inventions employ different starting materials and the practice of each method results in the formation of compounds having structurally distinct chemical cores.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Claims 50-54 link(s) inventions I, II and III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 50-54. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. A telephone call was made to Jeffrey Rosedale on March 4, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1623

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1623
